

Our democracy relies on a free, fair, and Open internet. Every day, journalists, voters, and activists rely on the FCC's Net Neutrality protections to communicate freely online.

Net Neutrality is simply the principle that Internet providers must treat all web traffic equally. It's the only thing stopping companies like Comcast & Verizon from controlling what we can see and say online -- and from censoring or slowing down speech they don't like.

I support strong Net Neutrality under Title II.
